THESIS TITLE

……

……

For this thesis, the selected option among the levels of generative artificial intelligence use specified below shall apply in accordance with İKÜ's Generative Artificial Intelligence Policies.

Only one of the options below should be selected.

Levels of Generative Artificial Intelligence (GenAI) Use

☐ **1. No Use of Artificial Intelligence:**
The use of GenAI tools is not permitted at any stage. All outputs must constitute the student's original work.

☐ **2. Supportive Use:**
The student must be the primary creator of the content. GenAI may be used only to a limited extent for secondary or technical support tasks, such as language editing and proofreading, improving textual fluency, formatting, or identifying errors in existing code (debugging). The student is responsible for reviewing and verifying all contributions made by GenAI.

☐ **3. Collaborative Use:**
GenAI may be used in processes such as idea development, drafting, and summarisation. The student must verify and critically evaluate the generated outputs and remains fully responsible for the final content.

4. Directed Generation and Oversight:
(*Although this level is included in İKÜ Generative AI Policies, it is strictly not permitted for theses and projects prepared within the İKÜ Graduate School!*)
A substantial portion of the work may be generated by GenAI. At this level, the primary competencies assessed are the student's ability to provide effective instructions and prompts (prompt engineering), verify complex outputs (fact-checking), ensure ethical oversight, and maintain the architectural and strategic integrity of the work.
